

Table 1:

The Fomer series consists of three types of pumps: 63S, 63L, 83s, 83L, 83ll, 103s, 103L, and 133S. The pumps are designed for various applications and are available in different capacities and configurations. The pumps are designed for various applications and are available in different capacities and configurations. The pumps are designed for various applications and are available in different capacities and configurations.

	63S	63L	83s	83L	83ll	103s	103L	133S
Number of pumps	3	3	3	3	3	3	3	3
Capacity (KGS)	35000	35000	60000	60000	65000	80000	90000	105000
Flow rate (PCS / min)	270	150	220	160	120	180	130	150
Number of pumps	8	8	10	10	10	12	12	15
Capacity (KGS)	70	120	85	135	175	105	180	140
Power (KW)	11	11	15	22	22	22	22	30
P.K.O. (PCS / min)	12	20	12	15	30	15	30	20
K.O. Stroke (mm)	52	115	65	125	165	80	165	110
Number of pumps	60	60	70	80	80	90	90	110
Capacity (KGS)	30	30	30	30	30	45	45	55
Dimensions (mm)	40 * 90	40x110	45 * 100	45 * 115	45 * 115	53 * 115	53 * 115	60 * 115
Dimensions (mm)	50 * 85	50x123	60 * 95	60 * 135	60 * 185	75 * 108	75 * 185	85 * 135
Applicable Bolt DIA (MM)	3-6	3-6	5-8	5-8	5-8	6-10	6-10	8 12.7
Number of pumps	10-50	30-100	12-60	30-110	30-150	15-75	30-150	20-105
Capacity (KGS)	7000	9000	10000	13000	15500	13800	19000	18000
