

Machine Main Features:

1. With large power, and main shaft is fixed steady. machine has high high rigidity as a whole.
2. three rounds of automatic centering stability, particularly advantageous to the axial feed, suitable for rolling large size, high strength, length-extended hollow tube, etc.

Technical Parameters:

ZP28-20 round die thread tolling machine				
Max. Rolling pressure			KN	200
Rolling spiline range	Max.diameter	Radial feed	mm	120
		Axial feed	mm	50
	Max.pitch	Radial feed	mm	5
		Axial feed	mm	6
Rolling die range	Max.outer diameter		mm	178
	Aperture		mm	54
	Max. width		mm	105
Max. Center distance btw. Main axis			mm	130
Main axis rotation			r.p.m.	49
Main axis inclination				±5°
Free travel			mm	5
Center height			mm	900
Gross power			KW	10.7
Dimensions□L×W×H□			mm	1500×1520×1750
Weight			Kg	3200
