

Máquina

Modelo	RSH10-120
Max.Diámetro en blanco (mm)	10
Max.Longitud en blanco (mm)	120
Max.Longitud de corte (mm)	140
Accidente cerebrovascular	150
(mm)	
Salida (PCS/min)	50-60
Diámetro principal de la die (mm)	Φ80x160
Diámetro de died de perforación (1er) (mm)	Φ55x150
Diámetro de died de perforación (2º) (mm)	Φ55x150
Corte el diámetro del troquel (mm)	Φ40x50
Tamaño del cortador (mm)	16x55x115
Potencia del motor principal (KW)	15hp/11kw
Tamaño de la máquina (L*W*H) (M)	4.80x1.80x1.70
Aprox peso (kgs)	8450

Para obtener más información, deje un mensaje y puedo darle una introducción detallada.

La máquina Head es una máquina de formación de molesto en frío profesional que coincide con una máquina de rodadura automática de alambre en toda la planta de la industria de los sujetadores.

Instrucciones de seguridad

Su propósito es el seleccionado, como el acero al carbono, el acero inoxidable, el aluminio, el cobre y el alambre de metal, con un molde apropiado, de acuerdo con el cable de presión permitido que, bajo el efecto de la unidad de conexión del cigüeñal, el deslizador, automatizado, rápido después del tamaño requerido del cable será una cizalladura automática, extrusión en el molde para el tipo de cabezal de sujetador necesario, diámetro del tallo, facilitado de roscar, o se convertirá en un rivet de rivet calificado automáticamente. La máquina de encabezado procesa automáticamente el cable en productos semi-terminados.

La máquina puede producir cabeza de armadura, cabezal de contraataque, tornillo de ajuste, tornillo

de madera, tornillo de cubierta, tornillo de auto -tocado, cabeza hexagonal plana, cabezal de sartén, cabeza hexagonal, cabeza de casquillo, cabezal de botón, etc.

SCREW MAKER

One die two blow heading machine. widely used to produce standard and non-standard screw. the machine is easy to operate and stable in performance

- Professional
- Good quality
- Energy conservation

PRODUCTION AREA

Provide You With A Variety Of Products Meet
The Different Needs Of Customers

SUPER HIGH QUALITY UNITS

SWING PNEUMATIC GRIPPER

DIGITAL BAFFLING OPERATED BY HAND WHEEL

DIGITAL FEEDING OPERATED BY HAND WHEEL

SLIDING SCREWED SLEEVE OF REAR K.O.

CUT OFF PART

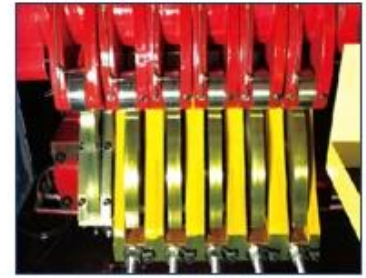

Due to the high accurate multi-function compound gripping mechanism, there are translational wide open gripper, nut gripper and turnover wide open gripper, and these 3 grippers can be interchanged and shared at will. However the key breakthrough design is that the turnover wide open gripper can both turn over and widely open, it expands the production range for different kinds of abnormal parts and reduces the manufacturing cost for the dies.

AIR CLUTCH

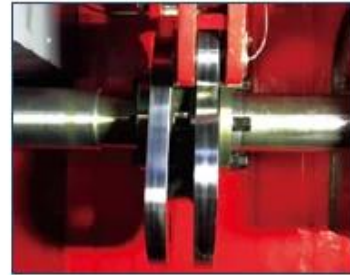

OPERATING

DIGITAL FEEDING

THE SWING OF
GRIPPER IS DRIVEN
BY CONJUGATE CAM

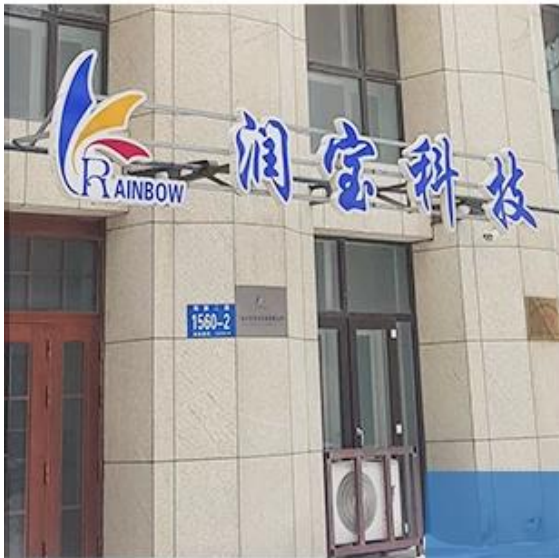

High accuracy main sliding block is designed to be connected with rear wing for letting it run stably and precisely, the bottom of front and back wing is adopted super wearing inserted copper plate with self lubrication, it can ensure accuracy and extend service life. The post stations of punching tool can be fulfilled the function of reverse punching.

FIELD OF PRODUCTION APPLICATION

Thanks to the advantage of the cold upsetting equipment itself and the superiority of cold upsetting technique, the formers also are widely used in different national economic territories for producing fasteners and abnormal non-standard parts such as aviation steamer, machinery , rail traffic, vehicle, motorcycle, bicycle, architecture, electric appliance , electronic and communication products, etc.

COMPANY PROFILE

Harbin Rainbow Technology Co.,Ltd comes from China National Machinery Import and Export Corp. Harbin branch. The main business is manufacturing cold forging machine, Bolt Maker, Nut Maker, Part Former, Screw Heading Machine, Thread Rolling Machine, Wire Drawing Machine and Mesh Belt Furnace, Zinc plating plant. etc.
