

La machine à rouler les filets adopte une conception de plaque de laminage de filetage à deux profils de filetage décalée de 1/2 distance de vis, une plaque est fixe, la plaque mobile est sur la plaque fixe pour effectuer un mouvement en ligne droite d'avant en arrière, lorsque la pièce à travailler se nourrit entre deux plaques, la plaque mobile avance, tord la pièce à travailler, transforme sa surface en plastique en filetage. Pour rouler le fil sur la tige vierge du boulon après avoir été embouti à froid.

THREAD ROLLING MACHINE PART OF THE STRUCTURE

TRANSPORTATION MATERIAL

Sloping filling-90 degree obliquity with main slider

TRANSPORTATION MATERIAL

Sloping filling-30 degree obliquity with main slider

NO HEAD SCREW

Through no head screw feeding system, the system solves problems in no head 'screw bottleneck with advanced value in machinery.

ORBITAL BRACKET

To stabilize filling progress in order to avoid floating head and increase fine quality.

FORCIBLE OIL CARRYING

It replaces traditional acrylic oiler which damaged main slider. This precision filter system not only lowers direct cost in production but also extends life usage in recycle.

AUTO FEEDING SYSTEM

Replaced cam by auto feed system, effectively avoids the cam abrasion in the production process.
