

Thread Rolling Machine

The working principle of thread rolling machine is to reciprocate the dynamic thread rolling die plate by the bending arm and the workpiece is pressed by the interaction with the static die plate. It can accurately grind various standard thread tooth of normal standard ISO, etc. The machine has the advantages of rapid speed and good stability, and the minute capacity can be up to about 300 pcs. It is an advanced thread machine with higher speed in the current market. It can also design coil abnormal screw and abnormal hardware and metal products especially according to customer requirements.
