

<http://> Overall, multi-station cold heading machines offer several advantages that improve the efficiency and quality of the production process. They are a great investment for industrial users who want to increase productivity and save costs while ensuring parts are of consistently high quality.

CUT OFF PART

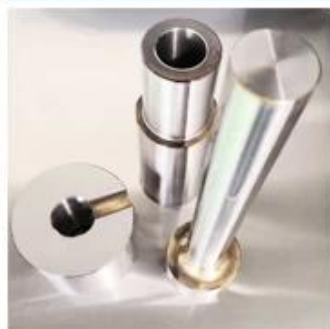

Due to the high accurate multi-function compound gripping mechanism, there are translational wide open gripper, nut gripper and turnover wide open gripper, and these 3 grippers can be interchanged and shared at will. However the key breakthrough design is that the turnover wide open gripper can both turn over and widely open, it expands the production range for different kinds of abnormal parts and reduces the manufacturing cost for the dies.

HIGH QUALITY SPARES

Machine production is guaranteed to extend the service life of the machine and reduce the frequency of replacement

COMPANY PROFILE

Harbin Rainbow Technology Co.,Ltd comes from China National Machinery Import and Export Corp. Harbin branch. The main business is manufacturing cold forging machine, Bolt Maker, Nut Maker, Part Former, Screw Heading Machine, Thread Rolling Machine, Wire Drawing Machine and Mesh Belt Furnace, Zinc plating plant. etc.

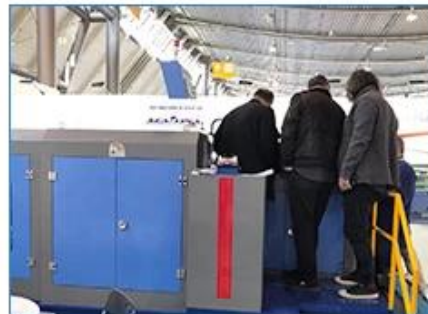

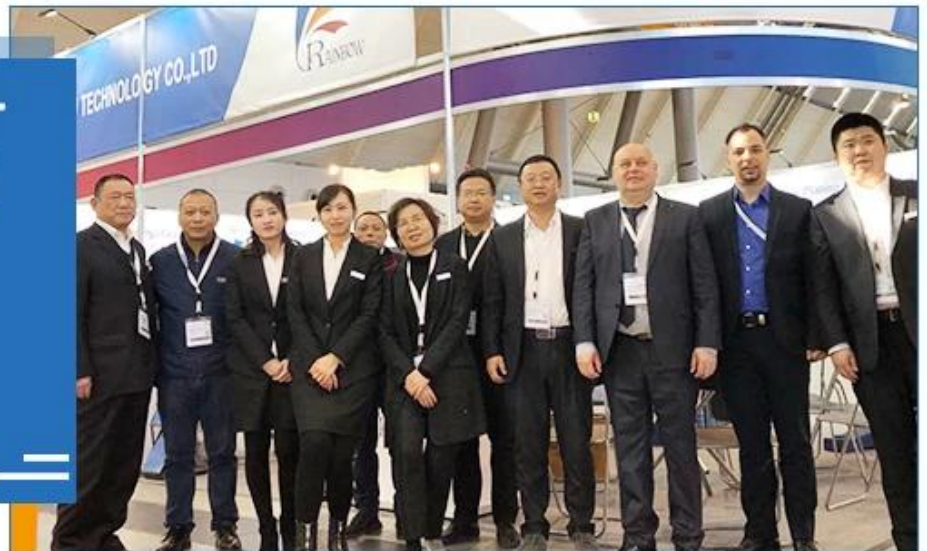

Our company is from Harbin Branch of China National Machinery Import and Export Corporation. After years of market development and experience

accumulation, it has become China's largest fastener equipment dealer and a turnkey consultant for foreign customers' fastener manufacturing projects. We provide high-quality and reliable machines for the entire fastener industry with professional and timely after-sales service. Our main products include wire drawing machines, bolt machines, nut machines, part forming machines, heading machines, thread rolling machines and mesh belt furnaces. We have established our reputation in countries with core customer base including India, US, Europe and Southeast Asia. At the same time, we are deeply respected by domestic factories and customers in the mechanical and electrical industry. We are confident that with our professional knowledge and experience in the mechanical and electrical industry, we can open up foreign markets for domestic companies and open up the Chinese market for foreign companies. <https://www.fastenerequipmentsupplier.com/yunsin/index.php>
